NetSuite Field Service Management SuiteApp

Streamline Field Operations with NetSuite Field Service Management Software

Empower Technicians, Track Jobs in Real Time & Automate Service Schedules — All Within NetSuite

SuiteWorks Tech's NetSuite Field Service Management SuiteApp is purpose-built to streamline and optimize field service and maintenance operations — all natively within NetSuite.It offers end-to-end management of service tasks, technician assignments, job tracking, consumables, and billing.

Key Benefits

- **Optimized Resource & Technician Management**
  Assign the right technician for every job based on skill and availability — improving service quality & on-time completion.

- **Automated Preventive Maintenance Scheduling**
  Automate maintenance using time or usage-based triggers to avoid breakdowns & ensure proactive servicing.

- **Seamless Billing & Accelerated Cash Flow**
  Automatically generate invoices once jobs are completed — reducing manual work and improving cash flow.

- **No Additional NetSuite Licenses for Technicians**
  Technicians use the FSM Mobile App without extra NetSuite licenses — saving cost while boosting mobility.

- **Mobile Compatibility Across Devices**
  Manage, update & close jobs on the go via Android or iOS devices — keeping technicians connected anywhere.

Key Features

Preventive & Reactive Service Management	Maintenance Job Order Management	Scheduled Maintenance Automation
Supports both preventive and reactive maintenance — maximizing uptime and extending equipment life.	Streamlines creation & management of job orders with technician assignments, material tracking, and integrated billing.	Automates recurring maintenance at fixed intervals — weekly, monthly, quarterly, or annually — ensuring timely service.

Usage-Based Maintenance Triggers

Schedules service automatically based on usage metrics like mileage, hours, or cycles to prevent overuse and downtime.

Technician Dispatch & Job Tracking

Assigns technicians intelligently and tracks progress in real time — optimizing workloads and improving visibility.

Job Reassignment

Reassigns jobs instantly when availability changes, ensuring uninterrupted operations and schedule flexibility.

Smart Job Rescheduling

Easily reschedules jobs in just a few clicks; updates reflect instantly in the mobile app for seamless execution.

Technician Job Execution

Technicians can log progress, update status, record time, and capture images — ensuring transparency and accountability.

Multi-Technician Support

Supports multiple technicians for complex jobs requiring collaborative effort and specialized expertise.

Technician Work Logs

Captures detailed logs with timestamps, parts used, and GPS data for accurate reporting and field accountability.

On-Job Consumables Tracking

Tracks consumables & creates Sales Orders automatically — ensuring accurate stock and cost visibility.

On-Demand Parts & Materials Requisition

Technicians can raise part requests from the job interface, triggering automated Purchase Orders for vendors.

Automated Billing for Completed Jobs

Generates invoices automatically once jobs are done, improving billing accuracy and cash flow.

Field Service Map View

Provides a visual overview of jobs, technician routes, and customer sites for smarter dispatch planning.

Maintenance Calendar View

Displays scheduled & ongoing maintenance in a single calendar for better coordination and planning.

Mobile App for Field Technicians

Technicians access job details, update progress, and log work directly via the FSM mobile app.

Real-Time GPS Job Tracking

Captures technician GPS coordinates at job start and end for accurate tracking and service accountability.

Seamless Integration with NetSuite

Built natively on NetSuite — ensuring all technician, inventory & billing data sync in real time without integrations.

Why NetSuite Field Service Management?

SuiteWorks Tech's FSM SuiteApp transforms NetSuite into a complete field service management platform — integrating scheduling, job tracking, inventory, and billing under one system.

It helps businesses deliver faster, smarter, & more cost-efficient field operations while maintaining total visibility and control within NetSuite.

Access Jobs Anywhere — FSM Mobile App

Empower your field technicians with our NetSuite FSM Mobile App, available for both Android and iOS.

They can manage, update, and complete jobs in real time — all without additional NetSuite licenses.
Stay connected, efficient, and fully synced with your NetSuite ERP.

100% Native NetSuite SuiteApp — No Integration Required

SuiteWorks Tech's Field Service Management SuiteApp is built entirely on NetSuite, eliminating the need for external connectors or middleware.

All field data — from technician logs to billing — remains unified, accurate, and fully traceable inside your ERP.
