

NetSuite Consolidated Invoicing Solution

Simplify billing and improve cash flow with SuiteWorks Tech's NetSuite Consolidated Invoicing Solution — a 100% native SuiteApp designed to transform your invoicing process. This powerful solution enables finance teams to combine multiple customer invoices into a single, easy-to-manage master invoice, streamlining accounts receivable, reducing manual work, and ensuring greater clarity and control. Fully built on NetSuite, it automates payment allocation and enhances visibility, making billing faster, more accurate & customer-friendly — all without third-party integrations.

Key Benefits

| Accelerate Collections & Simplify Billing

Combine multiple invoices into a single master record, reducing payment delays & administrative workload.

| Enhance Financial Accuracy

Automatically apply payments across linked invoices when the master invoice is paid — ensuring a clean general ledger and error-free reconciliation.

| Improve Customer Experience

Deliver one clear, consolidated invoice instead of several — simplifying communication and boosting customer satisfaction.

| Reduce Manual Effort

Automate repetitive tasks like invoice grouping and payment distribution, freeing your finance team to focus on strategic goals.

| 100% NetSuite-Native Solution

Built entirely on SuiteCloud for seamless integration with NetSuite ERP — no external systems or connectors required.

Why NetSuite Consolidated Invoicing Solution?

SuiteWorks Tech’s NetSuite Consolidated Invoicing Solution simplifies complex billing workflows by unifying multiple invoices into one consolidated master invoice — directly inside NetSuite.

It eliminates the need for manual consolidation or third-party add-ons, ensuring every financial transaction remains fully traceable and compliant within your ERP.

By automating payment distribution and providing real-time validation checks, this SuiteApp gives finance teams complete control and visibility — improving accuracy, transparency, and customer experience.

Whether you manage recurring billing, project-based invoices, or high-frequency transactions, SuiteWorks Tech helps streamline your billing process end to end.

Key Features

Centralized Invoice Selection

Select and group multiple open invoices for a customer from a dedicated NetSuite interface — quickly and accurately.

Automated Master Invoice Creation

Generate a single “Master Invoice” that consolidates all selected invoices into one billing record for easier management.

Real-Time Validation Checks

Ensure only eligible and accurate invoices are merged with built-in validations for status, payment eligibility, and customer match.

Smart Payment Distribution

Automatically apply payments to each linked invoice when the master invoice is settled — eliminating manual reconciliation.

Role-Based Security & Audit Trails

Control user permissions and maintain detailed audit history to ensure compliance and transparency in financial workflows.

100% Native to NetSuite

Developed fully on the NetSuite platform for seamless performance, faster deployment, and complete system compatibility.

Integration

The NetSuite Consolidated Invoicing SuiteApp integrates natively within NetSuite ERP, syncing all billing data in real time.

No external integrations or connectors are required — every invoice, payment, and reconciliation action is automated and visible across departments.

Why SuiteWorks Tech

SuiteWorks Tech is a trusted NetSuite solutions provider, delivering scalable, 100% native SuiteApps that enhance business efficiency & financial accuracy.

With proven expertise in ERP optimization, our Consolidated Invoicing Solution empowers finance teams to automate billing, reduce errors, and deliver a seamless customer experience — all from within NetSuite.
