

NetSuite Subscription Billing SuiteApp

**Automate Recurring Billing,
Subscription Lifecycles**

SuiteWorks Tech's NetSuite Subscription Billing SuiteApp automates the complete subscription lifecycle — including plan creation, recurring billing, renewals, changes, and cancellations. With unified subscription and revenue control inside NetSuite, businesses gain accuracy, faster billing cycles, and improved recurring revenue visibility.

Key Benefits

- **Reduce Manual Errors with Automated Billing** – Automated recurring billing ensures accurate invoices every cycle, reducing errors and eliminating manual workload.
- **Prevent Overcharges with Pro-Rata Calculations** – Pro-rata adjustments guarantee fair billing for partial-period usage, improving customer trust & satisfaction.
- **Improve Cash Flow Management** – Timely invoice generation at all billing frequencies helps avoid payment delays and ensures consistent cash flow.
- **Enable Smooth Customer Transitions** – Upgrades and downgrades are handled mid-cycle without disrupting billing accuracy, supporting higher retention.
- **Make Informed Business Decisions** – Real-time dashboards deliver financial insights into subscription performance for smarter decision-making.

Why NetSuite Subscription Billing?

NetSuite Subscription Billing enables businesses to scale subscription revenue with accuracy and compliance. As a fully native SuiteApp, it eliminates spreadsheets and integration challenges by aligning subscription operations directly with NetSuite's financials, CRM, and reporting capabilities.

KEY FEATURES

Automated Subscription Billing

Automatically generate accurate subscription invoices based on active plans. Billing runs occur on schedule without manual intervention, reducing errors and administrative overhead.

One-Time Billing

Handle additional non-recurring charges like add-ons or services directly on contracts. No separate processes or external systems are required for one-time transactions.

Recurring Billing

Automates billing frequencies such as monthly, quarterly, bi-monthly or annually. Ensures predictable cash flow and eliminates delays in the invoicing cycle.

Usage-Based Billing

Bill customers based on actual consumption including hourly usage or metered services. Supports multiple cycles like daily, weekly, or monthly to match operational needs.

Flexible Billing Schedules

Create and manage diverse subscription billing intervals in a single system.

In Advance / In Arrears Billing

Choose whether to invoice before service delivery or after usage is completed. Provides flexibility to align billing practices with customer expectations and business policies.

Accurate Pro-Rata Calculations

Automatically adjusts charges for mid-cycle activations or subscription changes. Ensures customers are billed fairly only for the services they consume.

Seamless Subscription Upgrades & Downgrades

Update pricing tiers, quantities, or plan levels without interrupting billing cycles. Changes are reflected instantly for accurate future invoicing.

Automated Subscription Renewals

Renewal cycles trigger automatically to avoid missed billing and revenue leakage. Enables smooth continuity of service and stronger long-term retention.

Subscription Termination Handling

Manages cancellations with proper final bill computation and credit adjustments. Provides accuracy & transparency during lifecycle closure.

Built-In Reporting & Dashboards

Analyze recurring revenue, churn rates, and subscription trends in real-time. All insights remain fully synchronized with NetSuite financial reporting

100% Native NetSuite SuiteApp — No Integration Required

Built entirely within NetSuite, the Subscription Billing SuiteApp eliminates reliance on external billing systems or third-party integration tools. All financial, customer, and revenue data stays centralized and accurate across departments.
