

Turn Receipts into NetSuite Expense Reports Instantly with AI & OCR

Turn Receipts into NetSuite Expense Reports Instantly with AI & OCR

SuiteWorks Tech's NetSuite Expense Management Mobile App simplifies how businesses capture, process, and manage employee expenses.

Using AI-powered OCR, employees can scan receipts on the go, automatically extract expense details, and submit expense reports directly inside NetSuite. This eliminates manual data entry, improves accuracy, and accelerates reimbursement cycles.

Built natively for NetSuite, the solution ensures real-time visibility and seamless expense management for modern finance teams.

Key Features

Mobile Receipt Capture

Capture receipts instantly using the mobile app—either by taking a photo with the camera or selecting an existing image from the gallery—and upload them directly to NetSuite to automatically create expense reports.

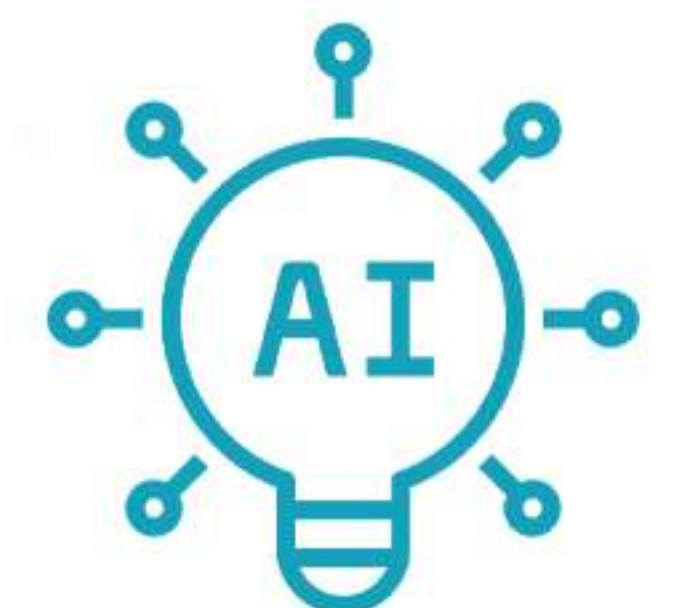

AI-Powered OCR Data Extraction

Automatically extract key expense details such as:

- Merchant name
- Expense date
- Amount
- Categories
- Receipt details

Smart Expense Mapping

AI automatically maps extracted data to the correct NetSuite Expense Report fields.

Real-Time Expense Submission

Employees can create and submit expense reports anytime, anywhere.

Travel & Expense Support

Supports complete NetSuite travel and expense workflows including receipt capture and report submission.

100% Native NetSuite Integration

All expense data flows directly into NetSuite without third-party tools or sync issues.

How It Works

1. Employee captures or uploads receipt via mobile
2. OCR extracts expense data automatically
3. AI maps data to correct NetSuite fields
4. Expense report is submitted for approval
