

Streamline Warehouse Operations with NetSuite

WMS MOBILE LITE SUITEAPP

Pick, Pack & Ship Faster with Mobile Scanning and Real-Time Inventory — Inside NetSuite

SIMPLIFY WAREHOUSE EXECUTION IN NETSUITE

SuiteWorks Tech's **WMS Mobile Lite SuiteApp** extends NetSuite Warehouse Management directly to mobile devices.

Designed for speed and simplicity, it enables warehouse teams to execute daily tasks using **iPhone and Android smartphones** — without additional NetSuite user licenses.

Operate faster, reduce errors, and keep inventory synced in real time — all within your NetSuite ERP.

KEY FEATURES

Mobile Receiving

Receive inventory against Purchase Orders using barcode or QR code scanning on iPhone or Android devices.

Mobile Bin Putaway

Put away received inventory into the correct warehouse bins using NetSuite Putaway Worksheets.

Inventory Count

Perform inventory counts by item, bin, lot, or serial number from your mobile device.

Bin Transfers

Transfer inventory between warehouse bins with real-time NetSuite inventory updates.

Mobile Picking

Pick items accurately against one or multiple Sales Orders using barcode or QR code scanning.

Batch Picking

Pick multiple Sales Orders in a single trip to reduce warehouse travel and improve productivity.

Mobile Packing

Confirm packed quantities and update NetSuite Item Fulfillment status directly from the mobile app.

Mobile Shipping

Ship Sales Orders and Transfer Orders directly from your mobile device with instant NetSuite synchronization.

Transfer Order Shipping

Ship inventory against NetSuite Transfer Orders using your mobile device with barcode scanning and real-time NetSuite synchronization.

Mobile RMA Processing

Process Customer and Vendor RMAs from one mobile application with complete NetSuite integration.

Bin, Lot & Serial Management

Support bin-managed, lot-numbered, and serialized inventory throughout every warehouse transaction.

Barcode & QR Code Scanning

Use your iPhone or Android camera to scan barcodes and QR codes without dedicated scanning hardware.

Mobile Label Printing

Generate and print barcode and QR code labels directly from your iPhone or Android device without returning to a workstation. Supports compatible label printers using ZPL, TSPL, EPL and ESC/POS printer languages for fast, seamless warehouse labeling.

Real-Time NetSuite Synchronization

Synchronize every warehouse transaction instantly with NetSuite for complete inventory visibility.

No Additional NetSuite User Licenses

Enable warehouse users to perform mobile transactions without consuming additional NetSuite user licenses.

BENEFITS

Faster Warehouse Execution

Accelerate receiving, putaway, picking, packing, shipping, and inventory counting with mobile workflows.

Increased Inventory Accuracy

Reduce picking and receiving errors using barcode-driven validation and real-time inventory updates.

Improved Warehouse Productivity

Complete more warehouse transactions with fewer steps and less manual effort.

Lower Operating Costs

Eliminate paper-based processes, reduce training time, and avoid additional NetSuite user license costs.

Complete Inventory Visibility

Track inventory by bin, lot, and serial number with real-time synchronization to NetSuite.

Scalable Warehouse Operations

Support single or multiple warehouses while growing seamlessly with your NetSuite business.

Native NetSuite Integration

Built 100% natively on NetSuite, WMS Mobile Lite integrates seamlessly with your ERP.

All warehouse transactions update inventory, fulfillment, and records in real time — delivering a single source of truth across operations and finance.

Who Can Benefit

Ideal for businesses that need **mobile-first warehouse execution**, including:

- Retail & E-commerce
- Wholesale Distribution
- Manufacturing Warehouses
- 3PL & Logistics
- Pharma & Healthcare Distribution
- Cold Storage & Lot-Controlled Inventory
